

# ANTICON

Got a tin roof? Combining glasswool and reflective insulation in a single product, Bradford Anticon has been specifically designed to provide superior thermal insulation, noise reduction and condensation control for metal roofs.

Bradford Anticon is specifically designed for temperature control in homes with metal roofs.

It is comprised of a glasswool blanket adhered to a foil facing. This reduces radiant heat entering a home during summer, and helps prevent condensation in winter. Installing Bradford Anticon under your metal roof also helps reduce unwanted noise from heavy rain and other sources by up to 13dB.

Bradford Anticon is available in a variety of thicknesses so you can choose the level of insulation that best suits your needs.

## Applications

Install under metal roofs to reduce heat transfer, control condensation and reduce noise caused by rain.

## Features and Benefits

- Keeps homes cooler in summer
- Prevents heat loss in winter
- Provides effective condensation control
- Saves on energy costs
- Reduces greenhouse gas emissions
- Reduces noise transfer into your home caused by rain
- Environmentally sound – made from up to 80% recycled content
- Helps meet BCA energy efficiency requirements

## Specifications

Product	Thickness (mm)	Dimensions (mm)	m <sup>2</sup> per roll	
Light Duty Anticon	55	60	15m x 1200	18
	75	80	15m x 1200	18
	95	100	10m x 1200	12
	110	110	15m x 1200	12
	130	130	10m x 1200	12
Medium Duty Anticon	55	60	15m x 1200	18
	75	80	15m x 1200	18
	95	100	10m x 1200	12
	110	110	10mx 1200	12
	130	130	10m x 1200	12
Heavy Duty Anticon	55	60	15m x 1200	18
	75	80	10m x 1200	12
	95	100	10m x 1200	12
	110	110	10m x 1200	12
	130	130	10m x 1200	12
